SUMMARY

Software Engineer with 4+ years of experience architecting Java/Spring Boot backend systems and cloud-native infrastructure (AWS/PCF). Specialized in migrating legacy monoliths to microservices, securing high-throughput enterprise APIs, and building highly scalable AI applications utilizing RAG and LLMs.

PROFESSIONAL EXPERIENCE

Software Engineer Intern | Arizona State University, USA

Oct 2024 – May 2026

- Engineered a full-stack hackathon management platform (React, Node.js, PostgreSQL) for 10 organizations, automating workflows and supporting 500+ concurrent users.
- Architected a real-time networking application utilizing WebSockets and Redis, implementing a custom bipartite matching algorithm to pair students with industry mentors based on NLP-extracted resume skills.
- Built a centralized Career Services portal (Next.js, AWS S3) and integrated custom Python/Pandas analytics dashboards, tracking resource usage and engagement metrics across 5,000+ monthly student interactions.

Software Engineer II | Dell Technologies, India

Mar 2023 – Jul 2024

- Architected fault-tolerant, asynchronous event-driven pipelines using Spring Boot, RabbitMQ, and IBM MQ to reliably orchestrate 1.5M+ daily transactions across distributed enterprise nodes.
- Provisioned cloud-native deployments on Pivotal Cloud Foundry (PCF) via GitLab CI/CD pipelines, configuring dynamic auto-scaling policies that optimized resource allocation and reduced infrastructure overhead.
- Expanded JUnit and Mockito test coverage of legacy Java modules from 15% to 70%, exceeding SonarQube quality gates and eliminating production regressions during major deployment cycles.

Software Engineer I | Dell Technologies | India

Sep 2021 – Mar 2023

- Refactored legacy ASP.NET SOAP monoliths into lightweight RESTful microservices, accelerating end-to-end payload response times by 30% and significantly reducing server memory consumption.
- Automated HashiCorp Vault credential rotation directly within CI/CD pipelines, eliminating manual database password updates and standardizing zero-downtime security patch cycles.
- Engineered a Python-based ETL pipeline that autonomously fetched, transformed, and securely delivered sanitized database records to external client NAS endpoints via strict cron scheduling.

Software Engineering Intern | Cognizant | India

Mar 2021 – Aug 2021

- Constructed a responsive financial dashboard interface using Angular and TypeScript, implementing state management and robust client-side form validation to reduce module data-entry errors by 25%.
- Developed REST APIs utilizing Spring Boot and Hibernate to automate high-volume account statement generation, optimizing PostgreSQL database queries for rapid retrieval.

EDUCATION

Master of Science, Software Engineering | Arizona State University

May 2026

Bachelor of Technology, Computer Science and Engineering | Dehradun Institute of Technology

May 2021

TECHNICAL SKILLS

Languages and Frontend: Java (8/11/17), Python, JavaScript, TypeScript, SQL, C#, React, Next.js, Angular

Backend: Spring Boot, Spring MVC, Spring Security, Hibernate/JPA, Node.js, FastAPI, RESTful APIs, Microservices, Event-driven Architecture

AI / ML: LLMs, Generative AI, RAG, OpenAI APIs (GPT-4, Whisper), Vector Embeddings (Pinecone), Multi-agent Workflows, NLP

Cloud and Databases: AWS (EC2, S3, ECS, API Gateway, Aurora PostgreSQL), Azure, Pivotal Cloud Foundry (PCF), PostgreSQL, MySQL, MongoDB, Redis, DynamoDB, Supabase

DevOps: Docker, Kubernetes, GitLab CI/CD, GitHub Actions, Jenkins, HashiCorp Vault, Git

PROJECTS

ClaimCheck (Real-Time AI Verification System)

Mar 2026

- Developed a multi-agent AI verification engine (Python, FastAPI) utilizing a RAG architecture to fact-check live meeting transcripts against trusted datasets via vector embeddings (Pinecone) and OpenAI APIs.

Orby (Voice-Driven Productivity Assistant)

Feb 2026

- Built a full-stack assistant orchestrating OpenAI Whisper for speech-to-text, intent classification, and multi-step agentic workflows; deployed containerized architecture on AWS EC2.
